

Professional audio and video technology to enhance teaching and engage learning

On average, educators spend **3-4 hours a day** in lectures with students¹

61%

of teachers time is now spent in virtual classes¹

44%

of students are not satisfied with the audio or video quality of remote learning classes¹

Teachers need to keep students engaged when teaching remotely¹

PROFESSIONAL AUDIO & VIDEO SOLUTIONS

CLASSROOM TEACHING

Reduce stress on crowded classrooms by allowing students to join when they can't get to class. Make sure all can be seen with a wall-to-wall 180° field of view camera allowing students to spread out and keep at a safe distance. And the teacher can always be heard clearly, with professional-grade audio that is easy to connect.

Solution: Jabra PanaCast & Speak 750

FLEXIBLE TEACHING

Teachers can continue engaging students, even from a distance. Move around freely while sharing educational material using a camera with a wall-to-wall 180° view of the room and a speakerphone with professional, crystal-clear audio and reliable wireless connectivity.

Solution: Jabra PanaCast & Speak 750 and Engage 65

VIRTUAL LEARNING

Remote learning can be made easier with simple, plug-and-play audio and video technology. Technology engineered to improve students' productivity, collaboration and keep them engaged, when learning from home.

Solution: Jabra PanaCast & Speak 750, Evolve2 40
